

Middle School Science

This year we will use Answers in Genesis' God's Design textbooks to study the ecosystems of the world and properties of matter. These fundamental subjects will introduce the student to a lifelong journey of learning about the world around them. Utilizing the textbook the student will share in the teaching responsibilities, taking turns giving presentations and leading experiments with the class. The reading is light. In addition to teaching/leading experiments, each semester an 8 minute presentation will be due.

Textbook:

Answers in Genesis: God's Design Properties of Ecosystems, 3rd Ed Orange book

Answers in Genesis: God's Design-Properties of Matter, 3rd Ed Orange book

Copy Cost: \$10 for entire year.

Supply Cost: Students will bring supplies for the entire class when leading experiments. The supplies are typical household products. The cost is nominal.
